

IN BRIEF
Jet Airways to start Chennai-Paris flight

MUMBAI
Jet Airways has announced two new flights directly connecting Chennai with Paris, and Bengaluru with Amsterdam from October 29, 2017. The airline will operate a daily service between Bengaluru-Amsterdam, while the flight between Chennai-Paris will be operated five days a week. The new flights will complement the airline's existing direct operations from Delhi and Mumbai. Airbus A330 aircraft will be deployed on these routes.

SAP unveils Gerhard Oswald Innovation Space

BENGALURU
German software maker SAP SE has unveiled its latest facility, the Gerhard Oswald Innovation Space, at Whitefield in Bengaluru. The company said since 2014, it had invested about €50 million in building the new facility which is located within the SAP Labs India campus. It is named after Gerhard Oswald, a former member of the SAP Executive Board.

Mindtree profit declines 27% on forex loss

BENGALURU
IT services company Mindtree's net profit fell 27% to ₹97.2 crore for the fourth quarter ended March 31, 2017, due to foreign exchange loss. The total revenue for the January-March quarter also witnessed a marginal decline. The Bengaluru-based company said that in the current year it expected a double digit growth in revenue on new deals.

Hyundai aims for annual sales of 1 million vehicles in India by 2021

The South Korean auto major plans to unveil a hybrid car model as part of its product introductions

SPECIAL CORRESPONDENT
NEW DELHI

South Korean auto major Hyundai, which aims to sell one million cars annually in India by 2021, will invest ₹5,000 crore to introduce eight new models in the country's market by 2020, a top official said on Thursday.

"In the next four years, by 2020, Hyundai will invest ₹5,000 crore to develop eight new products," said Y. K. Koo, managing director and chief executive officer (CEO), Hyundai Motor India. "Out of these, three will be new segment product. So every year, for the next four years, we will launch two new products," Mr. Koo said.

Hyundai Motor India, a wholly owned subsidiary of the auto major, sold a total of 6.62 lakh units in 2016 of which five lakh units were sold in the domestic market.

Protecting share: Hyundai aims to strengthen presence by holding on to its share of 17% in the Indian market.

Mr. Koo said the company had set a target of selling 6.72 lakh units in 2017.

"The volume break-up between domestic and exports will depend on how export markets are doing," Rakesh Srivastava, Director (Sales & Marketing) at Hy-

undai Motor India, said on the target for the current year.

"Overall, what we are looking at is to strengthen our presence by way of holding on to our market share of 17% in the India market," Mr. Srivastava said. "That is the

objective," he added.

Mr. Koo said the company, as of now, did not plan to expand its manufacturing facility in the country.

Hyundai Motor India unveiled the all new Xcent priced between ₹5.38 lakh and ₹8.41 lakh (ex-showroom Delhi). The model, which will come in 6 variants in petrol version and 5 variants for diesel version, will compete with the models such as Ford Aspire, Tata Tigor and the soon to be unveiled new version of Maruti Suzuki's Swift Dzire.

"Xcent is a compact sedan at less than 4 meters but the overall feeling is more luxurious and spacious than other models in the segment," Mr. Koo said, adding that more than 2.5 lakh units of the model had been sold in the domestic and international markets since 2014.

Hyundai plans to sell 5,000 units of the new car per month.

Fleet segment

Asked about the use of Xcent by cab-service providers such as Ola and Uber, Mr. Koo said the company would keep selling the older versions of the Xcent and Grand i10 to the fleet segment, including ride-sharing industry. The company targets to sell about 2,500-3,000 units per month to the cab aggregators, he said.

The company also plans to unveil the new Verna in India in the second half of 2017. Besides, the new introductions planned by the company will include a hybrid car model as well.

Hyundai is also planning to increase the number of dealers in India from 475 to about 500.

Wipro sacks 600 staff

STAFF REPORTER
BENGALURU

Wipro Ltd., the country's third largest IT services company, has sacked about 600 employees, according to a source.

The company, which confirmed some employees may be asked to leave as part of an "appraisal process", did not, however, give any specific number.

"Wipro undertakes a rigorous performance appraisal process on a regular basis to align its workforce with the business objectives, strategic priorities of the organisation, and requirements of our clients," the company said in an e-

mail response. "This systematic and comprehensive performance evaluation process triggers a series of actions such as mentoring, retraining and upskilling. The performance appraisal may also lead to the separation of some employees from the company and these numbers vary from year to year," it added.

More on cards

According to some employees, Wipro is likely to axe more people from mid-level managerial roles. Earlier, there were media reports that Wipro would reduce headcount by about 30% due to automation.

Hathway plans Chennai data centre

To spend up to ₹500 cr. on rolling out high-speed fibre

SPECIAL CORRESPONDENT
CHENNAI

Hathway Cable and Datacom Ltd., which plans to spend between ₹400 crore-₹500 crore for rolling out high-speed broadband services in Chennai, will set up a dedicated data and call centre in the city, a top official said.

"The investment is for providing end-to-end fibre solutions at a lightning speed," said Rajan Gupta, managing director, Hathway Cable and Datacom. The funding would be through internal accruals.

While most of the broadband operators in Chennai

are still using copper wire for transmitting data, Mumbai-based Hathway will use end-to-end fibre solution using Gigabit Passive Optical Network Fibre to home (GPON FTTH) technology. Chennai will be the first city where Hathway will roll out this technology, he said.

Hathway will set up a data centre and call centre in Chennai to support its high-speed broadband network. Over the next three years, the company plans to reach five lakh consumers in Chennai city. It will provide direct and indirect employ-

ment to over 1,000 people.

"We are making a fresh entry into the city. Right now, we have a data centre to handle two lakh consumers. This will be upgraded within a year to support over five lakh consumers. For the last three months, we conducted a soft launch of our new system in Chennai, New Delhi, Bengaluru and Kolkata," Mr. Gupta said.

Chennai was chosen as the monthly average data consumption of 90GB was twice the national average for Hathway's consumers.

Honda plans ₹1,600 cr. spending to add bikes

Targets sales of 6 million two-wheelers

LALATENDU MISHRA
MUMBAI

Japanese two-wheeler major Honda Motorcycle & Scooter India has lined up investment of ₹1,600 crore in 2017-18 for expanding capacity and developing new products, a top company official said.

"The Indian market is going to change when the auto industry will migrate to BS-VI," said Minoru Kato, President & CEO, Honda Motorcycle & Scooter India (HMSI). "The future is challenging but exciting. We are investing in an additional assembly line at our plant in Karnataka and by July 2017 our total capacity will go up to 6.4 million units a year. In 2017-18 our total investment will be ₹1,600 crore."

HMSI, which sold five million units in 2016-17 – the biggest volume achieved by any Honda motorcycle subsidiary worldwide, has set a target to sell six million units this year, an increase of 20%. Until last financial year, the company had made a cumulative investment of ₹7,800 crore and set up factories at four locations in the country, which includes Manesar (Haryana), Tapukara (Rajasthan), Narsapura (Karnataka) and Vithalapur (Gujarat).

Mr. Kato, who took over as the head of Indian operations on April 1, 2017, said after the ongoing expansion, there is no planned expansion till BS-VI norms comes into force in 2020-21.

Mr. Kato said Honda has plans to make India an export hub after BS-VI migration. "After 2020, after the application of BS-VI, our products in India will be ready to export everywhere. That will make India an export hub. From global

Honda point of view it is not yet decided which model will be exported from India but we are going to be ready and become an export hub. That is our expectation."

Currently, Honda's export hubs include China and Thailand. "We expect India also to be the next export hub," he said.

New models

Honda plans to introduce four new models this year, two scooters and two motorcycles. The company has also started trial assembly of its biggest 1000 cc superbike the Africa Twin in India. The company said all its products are now BS-IV compliant and that it was able to clear its inventory of BS-III vehicles before the deadline by offering discounts.

Towards its preparedness for BS-VI, the company has set up a high level task force. "This task force is cross functional from sales, engineering, R&D, Purchase and Quality. It is working on the primary objective of strengthening quality, product planning with cost competitiveness," the two-wheeler manufacturer said.

HMSI, which started operations in 2001, has grown to become India's second-largest two-wheeler company with more than 30 million customers.

Oil and Natural Gas Corporation Ltd.
